8. **DISCLAIMER OF RISKS**

- Our goal is to create an ecosystem within the XRPL that allows hand-drawn NFTs and the involvement of the community to exist together.
- As a member of XCROC family, you will be able to experience digital art. The growing NFT industry will reflect the increase of individuals in the community. We believe that XRPL growth and adoption over time will eventually become the normal method of payment.
- The XCROC team is confident that we will be on the right side of history.

VISION

- Our vision is to establish ourselves as the most unique pixelated NFTs on the XRPL blockchain.
- We want to bring awareness to the capabilities of XRPL and technology it brings to the community.

- Future NFT initiatives, marketplaces, videogames will be included.
- We aspire to be more than just a name.
- We want to remind people of the amazing features retro art has to offer.

- It is only natural that in the beginning there will be technical issues and misfortunes.
- We are confident that we will take care of any problems that arise along the way.

THE FUNDAMENTALS OF XCROC

The XRPL is the foundation of XCROC token. The XRP Ledger is a global developer community-led decentralized public blockchain. With ease of development it provides developers with a strong open-source foundation for executing on the most demanding projects. The XCROC project picked the XRPL blockchain for a variety of reasons.

The following are some of the XRPL's primary advantages:

Fast, energy efficient

Effortless development

High performance

Knowledgeable community

Low-Cost transaction

Proven reliability

TOKEN DETAILS

🛡️ **Issuer address:** rpLw9SsJz52DpYWL5ohS2s71FgVeohHACQ

🛡️ **Currency code:** XCROC

🛡️ **The XRP on-ledger code:** XCROC

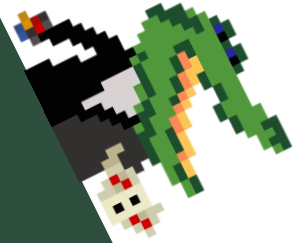

🛡️ **Amount issued:** 1000

🛡️ **Date issued:** 10/30/2021, 7:03:01 PM

TOKENOMICS

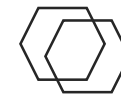

The XCROC token was intentionally made to allow its owners to exchange one token for one NFT when the XRP ledger is able to support NFT's. We are going to implement the burn mechanism: firstly, decrease circulating supply of tokens when holders exchange them, therefore increasing the demand. Secondly, obtaining one NFT for one token will maintain high incentive and demand to keep trading as token numbers decrease. This means that as holders you will be able to not only trade and hold NFT's but also keep the market liquid.

Issuer account is blackholed.

This means that there are no more than 1000 XCROC tokens ever to be made

There will forever be only 1000 XCROC.

TOKEN DISTRIBUTION

As we planned, the air drop was organized to take place on 2nd of November to give 50% of the supply to our first loyal trust-line holders.

To expand the exposure of XCROC tokens, various community based contests are taking place on our twitter and discord.

The giveaways are used not only to increase the circulation of tokens, but also to be grateful to our early supporters and holders.

Loyalty program will encourage holders obtain more XCROC for various reasons such as Discord roles, Loyalty Air Drop and our team's acknowledgement.

XCROC TOKENOMICS

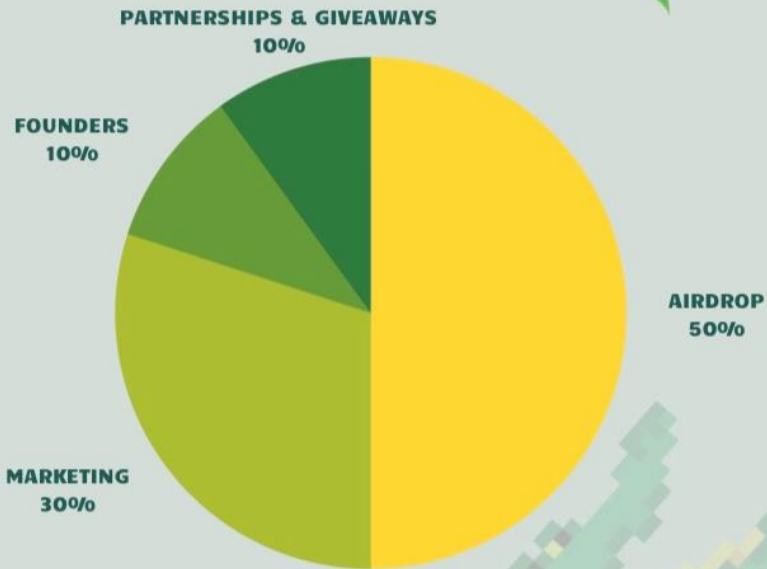

1000XCROC

0% - 500 TOKENS WILL BE
AIRDROPPED

0% - 300 TOKENS FOR
MARKETING

0% - 100 TOKENS FOR
PARTNERSHIPS OR
GIVEAWAYS

0% - 100 TOKENS FOR XCROC
FOUNDERS

THE XCROC NFT'S

So, what are the XCROCS?

- These are 1000 uniquely hand-drawn NFTs, each with their own unique style.
- They will have different qualities, each with different outfits and special items.
- Each XCROC token will get you a ticket to spin the wheel and receive a one of a kind XCROC NFT.
- Currently, we have designed and created more than 50% of the NFTs.

We are in the process of creating new qualities, like DC Universe XCROCS and different custom items.

New XCROCS will be revealed on a weekly basis on our twitter.

Suggestions of the new models in the discord will be discussed by our team.

We want you to have the most distinctive XCROCS possible.

LOYALTY PROGRAM

As the project progresses, XCROC will continue to grow and develop. We see endless prospects since we are at the center of a new and evolving ecosystem. We intend to develop marketplaces, and exciting new ventures. We will gift 15 XCROC(15 XCROC/people holding at least 1 XCROC) to everyone holding at least one XCROC token as a thank you to our current holders. A snapshot of current holders will be taken at some point in the future, before the minting. To give faithful holders a fair chance and avoid market manipulation, this will be an unplanned moment. More information will be released.

FUTURE WORK

In this whitepaper, we introduced XCROC, a new NFT project created on the XRPL. XCROC project encourages and provides with hand-drawn NFTs art and the ability for the community to participate in the development of the project.

There are many other aspects of the project, which we classify as future work that helps XCROCs scalability :

- **Gaming:** XCROC oriented games that would involve the community to tryout uniquely created game with rewards and ability to win XCROC tokens as a reward.
- **Merch :** Online merch store with hand-drawn Xcroc icon with the ability to create custom made merch so it suits every community member and helps to promote XCROC.
- **Customer support:** We are trying to improve our customer support to fulfill community members needs and answer their questions.
- **NFT distribution:** Our team has a unique way of distributing NFT's. Once the NFT's are possible on XRPL and it's redeemed, the investor has a unique opportunity to spin the wheel. With possible XCROC NFT's that are left as a way to redeem an NFT in the future (1Xcroc=1NFT).

DISCLAIMER OF RISKS

It is the responsibility of any XCROC holder to acknowledge and be aware of possible risks with blockchain technology. Prospective purchasers of XCROC are expected to consider the risk factors associated with spending money.

There are many risks such as:

Risk of technology: Blockchain technology is a expeditiously developing technological ecosystem. With changing dynamics in the environment, many unpredicted technological drawbacks and issues will most likely influence the price of XCROC.

Transaction risk: The actions of traders on the secondary market will always have an influence on the price of XCROC. The secondary market for cryptocurrencies that are using blockchain technology has magnificent volatility which may radically change the value of your XCROC token.

Risk of strategy: Frequently changing political and regulatory trends may lead to significant price volatility.

Risk of functionality: All operations carry inherent risks on a multitude of factors, which may be caused by factors such as companies internal problems, major strategic breakdowns and so on. Operational risks may always influence the success of the project and/or the value of the operations assets. Potential buyers of the XCROC token must realize this responsibility and perform meticulous and cautious analysis. It's not a commitment or a guarantee.
